Art Unit: 3611

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Beuerle on Nov. 14, 2000.

2. The application has been amended as follows:

In claim 1, line 1, --adapted to be-- has been inserted between "is" and "ridden". ✓

3. This amendment has been made for the purposes of insuring clarity in the claim scope.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: The prior art references of record fail to teach each and every limitation of applicant's invention as claimed. Applicant's arguments concerning the combinations of references set forth previously by the examiner have been considered and are persuasive. The examiner agree with applicant's statement that neither Houser ('157) nor Dickert ('900-- both references cited previously) teach devices which would be considered skateboards corresponding to an art recognized definition. Further it does not appear that the device reference of Houser, while being aluminum, can be made by an extrusion process. While the reference to Smisek ('743-- also cited previously) teaches the use of extruded channel sections (32) as elements to be added to a skateboard, the board itself is taught to be molded, and further would not admit of manufacture by extrusion, due to longitudinal discontinuities (as can be seen in the ramps 30 and the ends of the internal channels, shown in figures 6a and 7).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
